

# POREX® Reed Diffusers

Home Decor | Creative Design | Holiday Accents

## Key Benefits

- Fast wicking
- Excellent fragrance “throw”
- Engineered not to clog
- Colorfast manufacturing technology
- “No Flip” reeds
- Available in seven standard colors
- Custom colors available (minimum order requirements apply)

## Solutions That Make Scents.

POREX® Reeds are available for use in fragrance diffuser products, and they offer a surprising design element to the home, office, or personal space.

Specially engineered POREX Reeds feature high-performance capillarity and fragrance diffusion along the entire length of the wick as well as a homogeneous porous structure that provides a controlled and reliable rate of fragrance release.

POREX Reeds are manufactured utilizing colorfast processes and are engineered to prevent color “run” or migration as the fragrance solution moves and diffuses along the reed. POREX reeds are designed so that colors will not transfer or stain upon touching.

Available in seven standard color selections, POREX Reeds offer design flexibility and color selections to meet a broad variety of décor and accent possibilities, and are engineered for consistent and reliable fragrance release vs. rattan. POREX Reeds are engineered not to clog over time and don’t require “flipping”. As a result, they do not need to be handled once placed in the fragrance solution.
