

POREX® Hydrophilic High Pore Volume Sheet

S001306

Parameters	Value
Technology	Sintered
Material	Polyethylene (PE)
Property	Hydrophilic
Shape (in)	Sheet
Width (in)	3
Length (in)	6
Thickness (in)	0.125
Pore Size (µm)	20–38
Pore Volume (%)	N/A

Description:

Hydrophilic sheet for large pore volume applications. Typically used for filtration and wicking. Note that the sample size of this sheet is 8.5" x 11".

Final tolerances for commercial production will be supplied and agreed upon with a *Mutually Understood and Acceptable Specification Document*.

Disclaimer

This standard sample is for evaluation of form, fit, and function to determine product specification requirements for custom products. Please reference the values in our data sheet for specification guidelines of standard products. In Vitro Diagnostic (IVD), medical-surgical and pharmaceutical samples are for investigational use only and subject to specific application, test condition and regulatory requirements.
